

Cooking couldn't be easier. Zanussi cookers are designed with useful features to help you get the most out of the cooking experience. When Zanussi's in the kitchen cooking becomes a real joy.

### EASY ACCESS VIEWING

Unique inclined cavity design provides an easy view into the oven, which means that you can monitor the progress of your cooking without needing to open the oven door, ensuring perfect cooking results at all time.

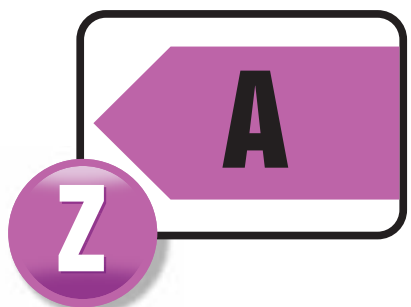

### EASY ACCESS CONTROLS

Ergonomically positioned at the front of the hob, the controls are easy to see and access, which means you don't need to bend or step away from the cooker to change heat settings. This also provides added safety as the controls are out of reach of children. Zanussi looks after all your needs!

### PROGRAMMABLE TIMER

Select the duration and end of your cooking time, and the programmable timer will automatically switch your oven on and off, enabling you to pre plan your day and still have the pleasure of piping hot meals.

### TOP CLASS PERFORMANCE

All Zanussi electric ovens offer 'A' or 'B' energy ratings, to couple brilliant economy with fantastic performance, delivering outstanding cooking results, and saving you money.

# COOKING EASY

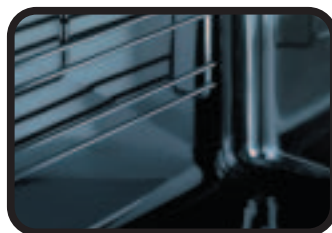

## EASY CLEANING

Zanussi cookers have been designed to make cleaning easier, leaving you time to enjoy and relax. Our electric cookers with ceramic hobs have been specially designed and built with a smooth hob surface and no dirt traps, making them easier to clean than any other cooker.

### CATALYTIC LINING

Catalytic lining on the top, back and sides of single and double ovens absorbs the splashes and grease from cooking. At high temperatures food residue is burned away, making light work of oven cleaning.

### CLEAR 'N' CLEAN ENAMEL

Clear 'N' Clean enamel is easy to maintain as its high gloss finish makes the removal of food residues easier, keeping the cavity clean, bright and hygienic.

### CHOICE OF WIDTHS AND DESIGN

The Zanussi cooker range offers you a wide choice and incredible flexibility to meet all your cooking needs. From 50, 55, 60cm wide single and double ovens to 100cm wide range cookers for the most stylish of kitchens - a clear and innovative range to give you the perfect fit.

## COOKING FEATURES AND FUNCTIONS

### HOB FEATURES

**GAS HOBBS** Different size burners, to accommodate different pan sizes offering you total cooking flexibility.

**GLASS LIDS WITH AUTO GAS CUT OFF** Provides added safety and a useful splashback when opened.

**CERAMIC HOBBS** Our fast ceramic zones heat in less than 5 seconds, for faster cooking - saving you time, energy and money!

**HOT HOB INDICATOR - FOR YOUR ADDED SAFETY IN THE KITCHEN** The indicator illuminates for your added safety and goes off when the hob is cool enough to touch.

**TRIPLE CROWN WOK BURNER** Available in the Zanussi range cookers. The wok burner gives maximum heat to ensure all your wok cooking is prepared to perfection - ideal for a stir fry!

**PAN SUPPORTS** All our pan supports are designed to give your cooker a professional appearance. The specially designed rubber feet provide added stability and safety while you cook.

### GRILL FEATURES

**SEPARATE GRILL** Zanussi cookers have a separate grill in the top cavity. This gives you the flexibility and convenience of using your oven while grilling.

**VARIABLE GRILL** Allows you to set the required temperature to deliver perfect grilling results for all types of food, giving you flexibility and control.

**OPEN AND CLOSED DOOR GRILLING** Available on certain electric models, closed door grilling provides the convenience of being able to grill with the door closed. This is a real benefit in narrow galley style kitchens, saves energy and provides added safety and a comfortable kitchen environment.

### OVEN FEATURES

**THERMAFLOW®** True fan cooking in the main oven. Air is circulated around the oven cavity ensuring an even temperature throughout your oven. This is ideal for batch baking. It saves cooking time and energy by heating up quickly and cooking at lower temperatures.

**CONVENTIONAL COOKING** Uses top and bottom heating elements to provide the perfect cooking method for traditional foods such as bread, pastries, and Christmas cakes.

**DEFROST SAFELY AND QUICKLY** The Thermaflow® fan circulates ambient air around frozen food, defrosting it in half the normal time. This is ideal for delicate foods such as gateaux.

**DOUBLE OVEN – PROVIDES EXTRA COOKING CAPACITY** The Thermaflow® main oven and conventional top oven provide the convenience and flexibility of being able to cook different dishes at the same time. And the extra capacity is really handy when entertaining or cooking large family meals!

**GAS COOKERS FEATURE MULTI-ZONE OVENS** The multi-zone oven is hotter at the top and cooler at the bottom making it great for cooking traditional foods such as your Sunday roast dinner.

**MULTI-FUNCTION** Offers all the benefits of Thermaflow® cooking combined with conventional cooking options such as top and bottom heat. This means you can achieve perfect cooking results for all the food types.

**PIZZA FUNCTION FOR CRISP BASES AND MELTED TOPPINGS** The Zanussi range cooker has a pizza setting which provides the perfect way to cook pizzas – crisp base and gently cooked topping.
